Subject: Limestone & Fitchville Quarries - S/049/044

Hello Jim:

We received a new notice during the holidays from Anderson Engineering. Due to the holidays, this notice and the permit fee was placed in a drawer in accounting. It was not retrieved until today and forwarded to us. Our deadline to respond to the operator is 1/14/04.

The new project is located close to Eureka, but is just inside the Utah County boundary.

The Fitchville Quarry project is located in SW1/4 NW1/4 NE1/4; UTM's - 408,588 E, 4,426,812 N
The Lime Peak Quarry project is located in SW1/4 NW1/4 SE1/4; UTM's - 408,588 E, 4,426,007 N
All within Section 4, Township 10 South, Range 2 West, Utah County

It's our understanding that an archaeological survey has been performed in the general locality with no significant sites found. It is unknown if a survey has been performed on this specific location (the company has not performed one).

They are very anxious to find out the quality of material that is there. Your help for a quick turnaround would be most appreciated.

Thank you.

Joelle

p.s. I have also faxed a copy of the notice and map to you.
